06/2022

Password Management App | Android

Professional-grade security application integrating KeePass library with intuitive Material Design interface, officially recognized on project platform.

## PROJECTS

---

06/2018 – present

### **BizManager**

*Information managing domain*

An B2B application that allows customers to configure and manage file transfers between applications using several protocols, such as PEPPOL, AS4, AS2, FTP, SFTP, HTTPS, and SMTP, as well as produce reports and audit transactions involving file transfers. Administrators can manage users, configure services and gateways, password policies, and download service logs. The application provides Administrator users and non-admin users whose access can be defined according to their role.

Role:

Lead Software Engineer (10 members)

Technologies:

Java, JSP, Spring, JavaScript, Ant Build, Micro Services, Kubernetes, MySQL, Oracle DB, Tomcat, Spring, RESTful and SOAP Webservices, Docker, Kafka

Responsibilities:

- Mentoring team members and holding developer meetings. removing blockers and facilitating regular technical touch-point meetings with other teams.
- Enhanced monitoring module to identify crash and performance related issues.
- R&D on new frameworks & features to enhance product capabilities.
- To design solutions for complex CRs and develop new modules..
- Responsible for production bug troubleshoot and fixes.
- Leading demos.

06/2016 – 06/2018

### **Way2Go**

*Travel & Expense domain*

A B2B product to ease the corporate organization's travel and expense division with ERP and Global Distribution System (GDS) integration. The product also features the data analysis portal to provide various ways to highlight the travel and expense reports. Large and small organizations can easily track business travel and expense anytime and anywhere.

Role:

Developer (Team Member – 12 members)

Technologies:

Java, Microservices, Velocity, MongoDB, Azure Service bus, Maven, Dropwizard

Responsibilities:

- Analyses and discuss the business requirements.
- Responsible for the feature development and implementation.
- Responsible for bug fixing and troubleshooting.
