

Summary

Lead Software Engineer with 13+ years of experience designing and delivering enterprise-grade solutions across diverse industries. Skilled in translating complex business requirements into scalable, secure, and maintainable architectures using Java, microservices, and cloud-native technologies.

Passionate about system design, performance optimization, and driving architectural decisions that align with long-term product vision. On a focused path toward becoming a Technology Architect, with a strong foundation in integration protocols, DevOps practices, and cross-functional collaboration.

Skills

Backend

Java/J2EE, ,Spring MVC, Spring Boot, JPA/Hibernate, REST/SOAP web service

Architecture

Microservices, Distributed Systems

Messaging/Streaming

Apache Kafka

Containers/Orchestration

Docker, Kubernetes

CI/CD & Quality

Jenkins, TeamCity, Sonar, Maven, Ant

Frontend

HTML, JSP, Servlet, JavaScript/jQuery, Android, Angular

Database

MSSQL, MySQL, Oracle 12c, MongoDB

Version Control

Git, Mercurial

Achievements

Application Certification Completion (Recognition)

OpenText
Certification awarded to BizManager, indicating proficiency in adhering to AS4 standards and compliance alignment for partners/customers.

Knight of Quarter (Award)

Wipro Technologies
Delivered 45% performance improvement through search module optimization in Way2Go.

Lead Software Engineer
03/2023 - **Present**
• 3 years 4 months
Bengaluru, India

Senior Software Engineer
06/2018 - 03/2023 • 4 years 10 mths
Bengaluru, India

Wipro Technologies

Software Engineer
06/2016 - 06/2018 • 2 years
Bengaluru, India

Spaneos Software Solutions

Software Engineer
07/2013 - 06/2016 • 3 years
Bengaluru, India

Education

Bachelor of Engineering

62.13%
North Maharashtra University
06/2009 - 05/2012
Jalgaon, India

Diploma in Information Technology

72.60%
Maharashtra State Board of Technical
Education University
06/2006 - 05/2009
Mumbai, India

Contribution

Open-Source contribution

Password Management App Native Android Application
Security application integrating KeePass library
with Material Design interface; recognized on the
project platform.

Key Projects

BizManager06/2018 – present

Information Management domain Enterprise B2B application enabling customers to configure and manage file transfers across multiple protocols and generate audit/reporting of transfers. Supports PEPPOL, AS4/AS2, FTP, SFTP, HTTPS, SMTP; includes user/service/gateway administration, password policies, and log downloads. - Led a 10-member engineering team delivering platform enhancements for an enterprise B2B file-transfer management product; drove technical execution, code quality, and delivery predictability. - Owned HLD/LLD for complex change requests, defining service responsibilities, API contracts, and backward-compatible behavior for production environments. - Improved observability/monitoring to detect crash and performance anomalies earlier; strengthened diagnosis workflows for production reliability. - Led cross-team technical touchpoints to unblock dependencies and align integration behavior across modules; reduced delivery risk for multi-team releases. - Owned critical production issue troubleshooting and fixes; ensured stable releases and faster recovery during incidents (add MTTR/incident metrics if available). - Conducted R&D on frameworks/features to expand product capabilities; proposed design options with tradeoffs for maintainability and scalability.

Way2Go06/2016 – 06/2018

Travel & Expense domain A B2B product to ease the corporate organization's travel and expense division with ERP and Global Distribution System (GDS) integration. The product also features the data analysis portal to provide various ways to highlight the travel and expense reports. Large and small organizations can easily track business travel and expense anytime and anywhere. - Analyzed and discussed business requirements; implemented features and delivered enhancements. - Performed bug fixing and troubleshooting for product stability and delivery.
