

Jayesh Ganatra

Summary

Lead Software Engineer with 13+ years of experience designing and delivering enterprise-grade solutions across diverse industries. Skilled in translating complex business requirements into scalable, secure, and maintainable architectures using Java, microservices, and cloud-native technologies.

Passionate about system design, performance optimization, and driving architectural decisions that align with long-term product vision. On a focused path toward becoming a Technology Architect, with a strong foundation in integration protocols, DevOps practices, and cross-functional collaboration.

jayeshsyif@gmail.com

Skills

Backend	Java/J2EE, ,Spring MVC, Spring Boot, JPA/Hibernate, REST/SOAP web service
Architecture	Microservices, Distributed Systems
Messaging/Streaming	Apache Kafka
Containers/Orchestration	Docker, Kubernetes
CI/CD & Quality	Jenkins, TeamCity, Sonar, Maven, Ant
Frontend	HTML, JSP, Servlet, JavaScript/jQuery, Android, Angular
Database	MSSQL, MySQL, Oracle 12c, MongoDB
Version Control	Git, Mercurial

Achievements

Application Certification Completion (Recognition)	OpenText	31/05/2024	Certification awarded to BizManager, indicating proficiency in adhering to AS4 standards and compliance alignment for partners/customers.
Knight of Quarter (Award)	Wipro Technologies	30/11/2017	Delivered 45% performance improvement through search module optimization in Way2Go.

Experience

OpenText	Lead Software Engineer	03/2023 – Present	Bengaluru, India
		• 3 years 4 months	
	Senior Software Engineer	06/2018 – 03/2023	Bengaluru, India
		• 4 years 10 mths	
Wipro Technologies	Software Engineer	06/2016 – 06/2018	Bengaluru, India
		• 2 years	
Spaneos Software Solutions	Software Engineer	07/2013 – 06/2016	Bengaluru, India
		• 3 years	

Education

Bachelor of Engineering	62.13%	06/2009 – 05/2012
	North Maharashtra University	Jalgaon, India
Diploma in Information Technology	72.60%	06/2006 – 05/2009
	Maharashtra State Board of Technical Education University	Mumbai, India

Contribution

Open-Source contribution	Password Management App	Native Android Application
	Security application integrating KeePass library with Material Design interface; recognized on the project platform.	

Certification

Oracle SQL Performance Tunning	Udemy	05/2026
	Enhanced expertise in Oracle database performance engineering through hands-on training in SQL optimization, execution plan analysis, indexing, and troubleshooting techniques. Strengthened ability to design and optimize data-intensive backend solutions, reduce query latency, improve system scalability, and support high-performance enterprise applications through effective database architecture and tuning practices.	

Key Projects

BizManager

06/2018 – present

Information Management domain

Enterprise B2B application enabling customers to configure and manage file transfers across multiple protocols and generate audit/reporting of transfers. Supports PEPPOL, AS4/AS2, FTP, SFTP, HTTPS, SMTP; includes user/service/gateway administration, password policies, and log downloads.

- Led a 10-member engineering team delivering platform enhancements for an enterprise B2B file-transfer management product; drove technical execution, code quality, and delivery predictability.
- Owned HLD/LLD for complex change requests, defining service responsibilities, API contracts, and backward-compatible behavior for production environments.
- Improved observability/monitoring to detect crash and performance anomalies earlier; strengthened diagnosis workflows for production reliability.
- Led cross-team technical touchpoints to unblock dependencies and align integration behavior across modules; reduced delivery risk for multi-team releases.
- Owned critical production issue troubleshooting and fixes; ensured stable releases and faster recovery during incidents (add MTTR/incident metrics if available).
- Conducted R&D on frameworks/features to expand product capabilities; proposed design options with tradeoffs for maintainability and scalability.

Way2Go

06/2016 – 06/2018

Travel & Expense domain

A B2B product to ease the corporate organization's travel and expense division with ERP and Global Distribution System (GDS) integration. The product also features the data analysis portal to provide various ways to highlight the travel and expense reports. Large and small organizations can easily track business travel and expense anytime and anywhere.

- Analyzed and discussed business requirements; implemented features and delivered enhancements.
- Performed bug fixing and troubleshooting for product stability and delivery.
