

Summary

Lead Software Engineer with 13+ years of experience designing and delivering enterprise-grade solutions across diverse industries. Skilled in translating complex business requirements into scalable, secure, and maintainable architectures using Java, microservices, and cloud-native technologies.

Passionate about system design, performance optimization, and driving architectural decisions that align with long-term product vision. On a focused path toward becoming a Technology Architect, with a strong foundation in integration protocols, DevOps practices, and cross-functional collaboration.

jayeshsyif@gmail.com

Skills

Backend	Java/J2EE, Spring MVC, Spring Boot, JPA/Hibernate, REST/SOAP
Architecture	Microservices, Distributed Systems, Domain Driven Design, API Design
Messaging/Streaming	Apache Kafka, ActiveMQ, Azure Service Bus
Containers/Orchestration	Docker, Kubernetes
CI/CD & Version Control	Jenkins, TeamCity, Sonar, Maven, Ant, Git, Mercurial
Frontend	HTML, JSP, Servlet, JavaScript/jQuery, Android, Angular
Database	MSSQL, MySQL, Oracle 12c, MongoDB
Domain Expertise	PEPPOL, E-Invoicing, AS2/AS4, B2B Integration, EDI, Secure File Transfer

Achievements

Application Certification Completion (Recognition)	OpenText31/05/2024
Certification awarded to BizManager, indicating proficiency in adhering to AS4 standards and compliance alignment for partners/customers.	
Knight of Quarter (Award)	Wipro Technologies30/11/2017
Delivered 45% performance improvement through search module optimization in Way2Go.	

Experience

OpenText	Lead Software Engineer03/2023 – Present • 3 years 6 months	Bengaluru, India
	Senior Software Engineer06/2018 – 03/2023 • 4 years 10 mths	Bengaluru, India
Wipro Technologies	Software Engineer06/2016 – 06/2018 • 2 years	Bengaluru, India
Spaneos Software Solutions	Software Engineer07/2013 – 06/2016 • 3 years	Bengaluru, India

Education

Bachelor of Engineering	62.13%06/2009 – 05/2012	North Maharashtra UniversityJalgaon, India
Diploma in Information Technology	72.60%06/2006 – 05/2009	Maharashtra State Board of Technical Education UniversityMumbai, India

Contribution

Open-Source contribution	Native Android Application
Password Management App	
Security application integrating KeePass library with Material Design interface; recognized on the project platform.	

Certification

Oracle SQL Performance Tunning	Udemy05/2026
Enhanced expertise in Oracle database performance engineering through hands-on training in SQL optimization, execution plan analysis, indexing, and troubleshooting techniques. Strengthened ability to design and optimize data-intensive backend solutions, reduce query latency, improve system scalability, and support high-performance enterprise applications through effective database architecture and tuning practices.	

Key Projects

BizManager

06/2018 – present

Information Management domain

Enterprise B2B application enabling customers to configure and manage file transfers across multiple protocols and generate audit/reporting of transfers. Supports PEPPOL, AS4/AS2, FTP, SFTP, HTTPS, SMTP; includes user/service/gateway administration, password policies, and log downloads.

- Provided technical leadership for a 10-member engineering team delivering strategic enhancements to an enterprise B2B integration platform, enabling reliable and secure document exchange across PEPPOL and other industry-standard messaging protocols.
- Designed end-to-end solution architectures and owned HLD/LLD for complex enterprise integrations, ensuring scalability, maintainability, and backward compatibility across the platform. A key highlight was the successful architecture and implementation of PEPPOL MLS capabilities, establishing compliance-aligned integration patterns and interoperability frameworks to support the evolving PEPPOL ecosystem.
- Enhanced platform observability and monitoring strategy, enabling proactive detection of performance bottlenecks and improving production reliability for business-critical integrations.
- Led cross-team technical touchpoints to unblock dependencies and align integration behavior across modules; reduced delivery risk for multi-team releases.
- Owned critical production issue troubleshooting and fixes; ensured stable releases and faster recovery during incidents (add MTTR/incident metrics if available).
- Evaluated and proposed architectural approaches, frameworks, and technology solutions, balancing performance, scalability, operational complexity, and long-term maintainability.

Way2Go

06/2016 – 06/2018

Travel & Expense domain

A B2B product to ease the corporate organization's travel and expense division with ERP and Global Distribution System (GDS) integration. The product also features the data analysis portal to provide various ways to highlight the travel and expense reports. Large and small organizations can easily track business travel and expense anytime and anywhere.

- Analyzed and discussed business requirements; implemented features and delivered enhancements.
- Performed bug fixing and troubleshooting for product stability and delivery.
